CORE SKILLS

- Network Architecture
- Core Networking
- Multi-Cloud Networking
- SD-WAN & SASE
- Data Center Fabric (ACI/NSX)
- Next-Gen Firewall (NGFW)
- VMware NSX-T / NSX-V
- Load Balancer
- VoIP / CUCM / SIP
- Python & Terraform (Basic)
- Network Automation
- Cloud Managed Networking

CERTIFICATIONS

NETWORKING
CCNP Enterprise
PCNSE – Palo Alto
JNCIA – Juniper
Fortinet NSE
Cisco Meraki
Silver Peak SD-WAN/SPOP
Aviatrix MCN Associate
Zscaler Digital Transformation Administrator

CLOUD
MS Azure Administrator
MS Azure Security Engr.
MS Azure Network Engr.
AWS Solutions Architect
Oracle Cloud Foundations
Oracle Cloud Architect
IBM Cloud Advisor
Alibaba Cloud Compute
Alibaba Cloud Security

PROFESSIONAL SUMMARY

Results-driven Network & Cloud professional with 10+ years of progressive experience designing, implementing, and managing complex enterprise and service-provider networks across Europe, the Middle East, India, and APAC. Deep expertise spanning multi-cloud networking (Azure, AWS, OCI), SD-WAN, data center fabrics (Cisco ACI, VMware NSX-T), and next-generation security (Palo Alto PCNSE, Checkpoint, Fortinet). Proven track record of authoring HLD/LLD architectures, leading infrastructure modernization programs, and delivering greenfield deployments end-to-end. Holder of 15+ industry certifications across networking, cloud, and security.

PROFESSIONAL EXPERIENCE

EMEA Lead Network Engineer | Kenvue

Prague, Czech Republic July 2024 – Present

- Technical manager responsible for delivery and management of on-prem and on-cloud network infrastructure for EMEA region
- Juniper Mist design and deployment
- MPLS & DIA migration through SDWAN & ZSCALER
- Network migration for organization separation
- Manufacturing site firewall replacement with Palo Alto
- Lifecycle management and refresh of current network infrastructure
- New office location infrastructure setup
- Cloud networking deployment & operations (AWS & AZURE)
- Backbone setup for the organization
- Procurement of the hardware and software services for EMEA region
- Lead the design, solutioning, deployment and operation of the infrastructure for the region.

Senior Lead – Network Services | Kyndryl Client Delivery Center

Prague, Czech Republic Nov 2020 – Jun 2024

- Served as Network Architect and SME for European hosted data centers, designing on-premises and multi-cloud solutions for concurrent enterprise customer engagements.
- Authored HLD and LLD documents with topology diagrams for new customer onboardings, infrastructure refreshes, and cloud migration programs.
- Engineered centralized transit network hub using Palo Alto NGFW and Cisco Catalyst edge devices, improving east-west traffic segmentation and unified security inspection.
- Designed hybrid cloud connectivity between customer DC/HQ/branch sites and AWS (VPC, Transit Gateway, Direct Connect), enabling secure low-latency application access.
- Architected Azure hub-spoke topology integrated with Fortinet SD-WAN, including Azure Firewall, Virtual WAN, and ExpressRoute for enterprise clients.
- Led VMware NSX-V to NSX-T migration, overseeing full overlay and underlay changes with zero unplanned production downtime.
- Managed Cisco ACI fabric and Nexus Fabricpath core switching, sustaining 99.9%+ availability SLA for all hosted customers.
- Deployed F5 LTM/APM reverse proxy and multi-environment load balancing for SaaS customer workloads across production, staging, and DR tiers.
- Maintained lifecycle compliance for Palo Alto, Checkpoint, Fortigate, and Cisco ASA firewalls including firmware upgrades and IDS/IPS signature management.

Network Consultant | Prime Solutions & Services FZE LLC

UAE / Oman Oct 2019 – Sep 2020

- Led end-to-end greenfield branch network design and deployment for an Oman enterprise client, delivering the full project on time and within budget.
- Architected Cisco Meraki cloud-managed network (MX-250 SD-WAN, MS-425/225 switches, MR-74/33 APs) for routing, switching, wireless, and security across all branches.
- Deployed CUCM VoIP telephony with ISR 4321/4331 gateways, full dial-plan design, SIP trunks, and Cisco Unity voicemail for 100+ users.
- Deployed Windows Server 2019 for RADIUS (802.1X), DNS, and TFTP/SFTP services; provisioned Azure AD, VNets, Intune MDM, and Microsoft Teams.
- Integrated legacy CCTV/biometric access control and building automation systems with logical segmentation into the new network.

EDUCATION

B.E. – Electronics & Telecommunications

MTNL CETTM
Data Communication

INTERESTS

- Cloud Networking
- Infrastructure as Code
- Network Security
- SDN / SASE
- DC Design & Ops
- Network Automation
- AI based networking

Senior Network Engineer | Cybage Software Pvt. Ltd.

Pune, India Aug 2017 – Aug 2019

- Managed enterprise network for global clients across 10+ branches and 2 data centers in Americas, Europe, and APAC.
- Administered clustered Palo Alto (PA-200/5280/7000/VM) and Cisco ASA 5585/5510/5520 firewalls; executed firewall migration and upgrade projects.
- Deployed and operated F5 LTM/GTM load balancers and Cisco Nexus 2K/5K DC switching; maintained MPLS, DMVPN, and internet WAN circuits.
- Owned escalation resolution for network incidents, reducing MTTR through structured RCA and proactive monitoring implementation.

Engineer – Network Operations | Virtela / NTT Communications

Mumbai, India Jul 2015 – Jul 2017

- Managed global MPLS backbone and customer-edge networks for NTT Communications, ensuring SLA compliance across enterprise accounts worldwide.
- Resolved complex incidents spanning BGP, OSPF, EIGRP, MPLS, IPSec, DMVPN, HSRP, VPLS, maintaining continuity for Tier-1 enterprise customers.
- Managed NFV cloud services (WAN Optimization, SSL VPN, IPSec, UTM) and operated Cisco, Juniper (M7i/M10i), and Alcatel-Lucent (7750SR) infrastructure.

Enterprise NOC Engineer | Ericsson (Reliance Communications)

Mumbai, India Jun 2014 – Jun 2015

- Monitored and managed ISP and MPLS WAN infrastructure with proactive/reactive fault management for enterprise L3 VPN customers.
- Troubleshot OSPF, BGP, MPLS routing and Layer-1 transport faults on Cisco 7600, Juniper M7i/M10i, and Huawei W60 platforms.
- Performed SDH fault isolation (loop testing, circuit breaking, NMS mirroring) on Fibcom, Nortel, and Marconi transmission equipment.

SELECTED PROJECT HIGHLIGHTS

- Cisco SDWAN and Zscaler SIG integration for WAN optimization and migration
- EMEA HQ deployment using Juniper Mist
- Backbone deployment
- Transit Network Hub: Designed and deployed centralized Palo Alto NGFW transit hub with Cisco Catalyst edge for segmented east-west security inspection across European DCs.
- AWS Hybrid Connectivity: Architected DC-to-AWS connectivity (VPC, Transit Gateway, Direct Connect/VPN) for multiple European enterprise customers at Kyndryl.
- Azure SD-WAN Integration: Delivered Azure hub-spoke topology with Fortinet SD-WAN, ExpressRoute, and Azure Firewall for optimized branch-to-cloud connectivity.
- NSX-V to NSX-T Migration: Led complete overlay/underlay network migration for hosted DC customers — zero unplanned downtime across all production environments.
- Greenfield Branch (Oman): Full-stack branch delivery covering SD-WAN, VoIP (100+ users), wireless, CCTV integration, RADIUS AAA, DNS, and Azure/Intune.
- F5 Multi-Tier Load Balancing: Designed multi-environment F5 LTM/APM solution supporting production, staging, and DR for SaaS customer application workloads.

TECHNICAL SKILLS

Routing & Switching: BGP, OSPF, EIGRP, MPLS, DMVPN, VPLS, VRF, HSRP, STP/RSTP, 802.1Q, QoS
Firewalls & Security: Palo Alto, Checkpoint, Fortigate, Cisco ASA, Cisco ISE, IDS/IPS, SASE
Data Center: Cisco ACI, Nexus 2K/5K, VMware NSX-T/V, F5 LTM/GTM/APM, Fabricpath
Cloud: Microsoft Azure, AWS, Oracle Cloud, IBM Cloud, Alibaba Cloud, Aviatrix
SD-WAN: Cisco SDWAN & Meraki, Silver Peak, Fortinet SD-WAN, ISP Failover, Traffic Shaping
Voice & Wireless: CUCM, Unity, SIP/H.323, Imagicle; Cisco WLC, Meraki MR, 802.11
Automation: Python (in dev), Terraform IaC (in dev), NetFlow, SNMP, IPERF, Cisco DNA
